# CivicFlux | Delhi infrastructure & finance reference

Source-verified briefing • 27 October 2026 • For the CivicFlux Delhi dashboard, map, planning and research APIs

Scope: Municipal Corporation of Delhi general-account budget (uploaded PDF), IIT Delhi / DDA Drainage Master Plan (2018), Economic Survey of Delhi 2025–26, and Delhi Traffic Police corridor inventory. Historic and administrative figures are not live operational inventories.

## Executive findings

| Theme | Reference finding | Correct CivicFlux use |
|---|---|---|
| **MCD budget FY 2025–26** | ₹17,011.92 crore planned expenditure | Historical budget context, not remaining available funds |
| **Storm-water drainage** | 201 natural drains in the historic 1976 inventory across three basins | Basin-level reference only; inspect geometry and newer records |
| **Transport** | 87.61 lakh registered motor vehicles as of 19 March 2026 | Fleet stock, NOT concurrent traffic or vehicle counts on roads |
| **Road network** | Official Delhi Traffic Police list of 28 Category-A corridors plus other B/C stretches | Named road reference; not live congestion or complete street network |

## 1. Municipal budget — MCD general account

Source: uploaded Municipal Corporation of Delhi, General Wing Volume I, Revised Budget Estimates 2024–25 & Budget Estimates 2025–26; PDF page 7, Summary of Expenditure, and PDF pages 6 and 10 for income/revenue-capital context. Source tables are in ₹ lakh; figures below are converted to ₹ crore (divide lakh by 100).

| Expenditure group | FY 2024–25 revised (₹ crore) | FY 2025–26 estimate (₹ crore) |
|---|---|---|
| **General administration** | 3,726.71 | 4,342.33 |
| **Community services** | 48.13 | 82.36 |
| **Education** | 1,645.53 | 1,695.74 |
| **Public health & medical relief** | 1,813.56 | 1,838.51 |
| **Sanitation** | 4,305.31 | 4,907.11 |
| **Public works & street lighting** | 2,852.71 | 2,396.11 |
| **Horticulture** | 359.76 | 393.76 |
| **Exclusive development expenses** | 782.89 | 475.10 |
| **Total expenditure — all groups** | 15,767.78 | 17,011.92 |

FY 2025–26 estimated total income: ₹16,701.05 crore (uploaded PDF page 6). FY 2025–26 revenue expenditure ₹16,671.02 crore and capital expenditure ₹340.90 crore (page 10); together ₹17,011.92 crore. Beware that department totals include both revenue and capital expenditure and may not directly fund CivicFlux interventions.

What NOT to infer: Remaining budget today, ward-level pump/crew allotment, real per-incident spending authority or current expenditure. These require approved operational ledgers, payment/booking records and authorized departmental availability.

## 2. Storm-water drainage — IIT Delhi / DDA Drainage Master Plan

Primary report: Drainage Master Plan for NCT of Delhi (IIT Delhi; 2018 copy hosted by Delhi Development Authority). In its introductory Table 1.2-3, the plan reproduces a 1976-era historical inventory of natural drains:

| Major drainage basin | Natural drains in historical 1976 inventory | Share of total |
|---|---|---|
| **Najafgarh** | 123 | 61.2% |
| **Barapullah** | 44 | 21.9% |
| **Trans-Yamuna** | 34 | 16.9% |
| **Total** | 201 | 100% |

The report identifies Najafgarh as the largest basin, covering close to two-thirds of the NCT area, and explains that much storm water ultimately discharges toward the Yamuna. The historical 201 count must NOT be presented as the current count of every engineered municipal street drain.

Additional DDA/NIUA Master Plan 2041 baseline material gives a separate, differently scoped description of around 1,300 drains covering approximately 1,700 km, and approximately 22 main drains. Treat these as different inventories, not numbers to add to 201. The master plan also describes six drainage zones; matching basins, zones and ward boundaries requires GIS topology.

## Drainage network inventory design

A full named list of every drain and its spatial lines is not reliably established by the basin-count summary. Do not invent a table of 201 drain names. A map-ready drain inventory should be extracted from the report maps/appendices or an authoritative drainage GIS inventory, then verified and versioned.

| Field | Meaning |
|---|---|
| **drain_id** | Stable authority-defined identifier |
| **drain_name** | Official name if available; otherwise null |
| **basin** | Najafgarh / Barapullah / Trans-Yamuna |
| **geometry** | Verified polyline, not guessed coordinates |
| **upstream/downstream** | Verified connectivity |
| **agency** | Responsible owner/maintainer |
| **capacity_m3s** | Measured/design value with source, or null |
| **asset_status** | Observed inspection/maintenance condition |
| **source_page/date** | Evidence and temporal provenance |

Drainage ownership is split among multiple agencies (including Irrigation & Flood Control, MCD, PWD, DDA, Delhi Jal Board and NDMC). CivicFlux should not assign a drain to MCD just because it lies within a Delhi ward.

## 3. Delhi transport — Economic Survey 2025–26

Delhi Planning Department, Economic Survey of Delhi 2025–26, transport chapter and highlights (reported for March 2026).

| Statistic | Value | Date / interpretation |
|---|---|---|
| **Registered motor vehicles** | 87.61 lakh | 19 March 2026; registered fleet |
| **Cars and jeeps** | Approximately 25% | Share of registered motor vehicles |
| **Two-wheelers** | Approximately 68% | Share of registered motor vehicles |
| **Public bus fleet** | 6,100 buses | March 2026 |
| **Electric buses** | 4,338 buses | March 2026 |
| **Metro network** | Approximately 352 km | As described in Survey; includes NCR/airport sections |
| **Transport allocation** | ₹12,111 crore | Delhi government transport sector, FY 2025–26; NOT MCD budget |
| **Transport amount utilized** | ₹10,341 crore | By 20 March 2026 per Economic Survey |

The registered motor-vehicle stock does not measure vehicles moving now, traffic volume on one road, average speed or congestion severity. Do not feed these totals into the anonymous-junction vehicle-count model as time-series input. Live traffic requires an actual geolocated provider or a compatible measured counter.

Road-network reference from Delhi Traffic Police basic-facts page: published road length 33,198 km, but the page includes older vehicle-count series and has an unclear road-length reference date; do not equate this automatically with a 2026 Economic Survey figure. Delhi Traffic Police also reported 134 congestion locations/stretches in its March 2024 survey (as cited by Union MoRTH in March 2025). These are historic hotspots, not today's incidents.

## 4. Officially named Delhi road corridors

Source: Delhi Traffic Police, "Major Corridors". The following is the Category-A corridor list (28 numbered entries plus one 9A sub-entry). This is a named priority-corridor inventory, not all Delhi roads and not a GIS polygon/line export. Corridor extents and reported lengths must be retained separately from the road name.

| Named corridor / selected stretch | Published approx. km |
|---|---|
| **Aurobindo Marg** | 10.9 |
| **Mathura Road** | 11 |
| **Savitri Flyover** | 1 |
| **Mehrauli–Badarpur Road** | 11.2 |
| **IGNOU Road** | 2.5 |
| **Kalindi Kunj Road / Road No. 13A** | 4.6 |

| | |
|---|---|
| **Mehrauli–Gurgaon Road** | 7.1 |
| **Shantipath–RTR Marg** | 3.5 |
| **Dhaula Kuan corridor** | 3.8 |
| **Sardar Patel Marg** | 4 |
| **Kamal Ataturk Marg** | 1 |
| **D. B. Gupta Road** | 3 |
| **New Rohtak Road** | 2.5 |
| **Patel Road** | 5.6 |
| **Najafgarh Road** | 19 |
| **Rohtak Road** | 19 |
| **Pankha Road** | 5.6 |
| **Outer Ring Road (Hanuman Setu–Chandgi Ram Akhara)** | 3 |
| **Road No. 43** | 5 |
| **Ring Road (Vijay Nagar–Burari)** | 4 |
| **Outer Ring Road (Bhalswa–Transport Nagar)** | 2.5 |
| **GT Karnal Road** | 6.4 |
| **Shaheed Jagat Narain Marg** | 3.2 |
| **Dr. M. C. Davar Marg** | 8.5 |
| **Maharaja Agrasen Marg (Shalimar Bagh)** | 2 |
| **Vikas Marg** | 7 |
| **GT Road (Yamuna Flyover–Apsara Border)** | 16 |
| **66 Feet Road Extension** | 3.7 |
| **Pusta Road (Khajuri Pusta)** | 20 |

Additional official Category-B examples: Asaf Ali Road, Pusa Road, Shyama Prasad Mukherjee Marg, Wazirabad Road, Old Patparganj Road, Akbar Road, Ashoka Road, Burari Road, Badli–Bawana Road, Nelson Mandela Marg, Ravidas Marg and Dwarka–Dabri Drain Road. The source has Category-C corridors too. For all Delhi street geometry, use a duly licensed OSM-based road graph with attribution; join official road names by confirmed route or spatial matching, not text similarity alone.

## 5. How CivicFlux should use these datasets

| App area | Recommended presentation / behavior |
|---|---|
| **Overview** | Show verified historic financial/transport reference cards with fiscal/as-of dates; show current road advisories separately |
| **City Map** | Plot source-verified drainage assets and road geometries with separate layers, provenance and update dates |
| **Infrastructure** | Show 3 basins, administrative jurisdictions and reference transport statistics; never invent ward crew numbers |
| **Predictions** | Train/inference contracts remain unchanged; historic citywide totals are context rather than live model input |
| **Planning** | OR-Tools works from administrator-validated AVAILABLE crews, pumps and discretionary budget, not headline MCD budget |
| **Incident review** | Geolocate complaints to mapped road/drain assets only when there is sufficient |

| | |
|---|---|
| | coordinate/ward evidence |

## 6. Suggested project data files

data/reference/delhi_mcd_budget_2025_26.csv — dept, fiscal_year, estimate_type, amount_inr, source_pdf_page, department_scope

data/reference/delhi_drainage_basins.csv — basin_id, basin_name, historical_natural_drains, inventory_year, source_url

data/reference/delhi_drain_assets.geojson — only after extracting and verifying real geographic line features

data/reference/delhi_transport_2025_26.json — vehicle fleet and buses, reference_date, units, source

data/reference/delhi_official_road_corridors.csv — corridor_name, category, from, to, approximate_length_km, source_url

data/operational/ward_resource_inventory — admin-owned staff, pumps, vehicles, shifts, availability, updated_at, approvals

## 7. Data limitations and quality checklist

• MCD ≠ Delhi Government: do not combine the MCD general-account budget and GNCTD transport allocation as one spending pot.

• 201 natural drains ≠ all storm-water drains; historic figures must be labeled by their original inventory year.

• Economic Survey vehicle stock ≠ vehicles on the road right now.

• Official corridor names and lengths ≠ geocoded road coordinates; route-map geometries require separate validation.

• Publicly reported department workforce ≠ available crews in a particular ward.

• Historic data can inform scenario scale and civic context, not validate flood, traffic or cascade model deployment.
